SAFE TO HOST CERTIFICATE

ISSUED DATE: 19th August 2026

UNIQUE CERTIFICATE NO.	: TAC/2025-26/MoAFW/087
FINAL CLOSURE REPORT DATE	: 13th August 2026
APPLICATION NAME	: Soil Health Card (SHC)
ENVIRONMENT USED	: Web Application – MERN Stack (MongoDB, React.js, Node.js, Express.js)
STAGING URL OF THE APPLICATION	: https://shc-dev.ddns.net/
PRODUCTION URL OF THE APPLICATION	: https://soilhealth.dac.gov.in/
IMPLEMENTED WEB APPLICATION FIREWALL	: Yes
HASH VALUE	: 07b76d8e7a70b7105ea95159d14901a5
AUDIT TENURE	: 17th June, 2026 to 25th June, 2026
TESTED ROLES	: Central user, State user, District user, STL user, Supervisor Use Scheme Admin, RAWE user, School User, Batch user, Manufacturer, ICAR User, Fertilizer manufacturer
AUDIT PERFORMED BY	
NAME	: Durga Sai
EMAIL	: durga.sai@tacsecurity.com
MOBILE NO.	: 8978285065
CERTIFICATE VALIDITY	: 19th August, 2026 to 19th August, 2027

CONCLUSION

Auditing for Soil Health Card (SHC) web application was done on 13th August, 2026 as per the CERT-In Audit guidelines, by TAC Infosec Ltd. as per the scope received on 17th June, 2026.The application is free from OWASP v 4.0.3 (and any other known) vulnerabilities and is safe for hosting. The clearance for the above application is given into consideration that the OWASP (and any other known) vulnerabilities do not exist in this application. Any unapproved changes to the application will void the certificate. We are granting write permission on domain/upload.

RECOMMENDATIONS

Implement strong authentication and authorization controls, including MFA, secure password policies, and proper session management. Upgrade and patch all servers, databases, frameworks, and third-party components regularly. Enforce rate limiting and cooldown mechanisms to prevent abuse of authentication features. Disable deprecated protocols and weak cipher suites, and use only secure TLS configurations. Implement security headers, clickjacking protection, and prevent caching of sensitive information. Remove version disclosure from application responses and restrict CORS access to trusted origins only. Conduct regular security assessments and monitoring to ensure ongoing protection and compliance.

HOSTING PERMISSION

Site may be considered safe for hosting with Read and Script Execute permission only.
